

Active Transportation Planning in Alameda

WHAT IS THE ACTIVE TRANSPORTATION PLAN?

Alameda's Active Transportation Plan will be a consolidated bicycle and pedestrian planning document. It will make and prioritize recommendations for improving walking and bicycling in the city.

WHAT IS ACTIVE TRANSPORTATION?

Active transportation includes people who bike, walk, use wheelchairs or other mobility devices, kick or electric scooters, electric bikes, skateboards, or other similar wheeled vehicles. Basically, anything that could legally use the sidewalk or a bicycle lane or path!

WHAT IS OUR APPROACH?

The City of Alameda is dedicated to providing safe, comfortable, and accessible ways for people of all ages and all abilities to walk, roll, and bicycle throughout the city.

The Alameda Active Transportation Plan will focus on:

SAFETY

COMFORT

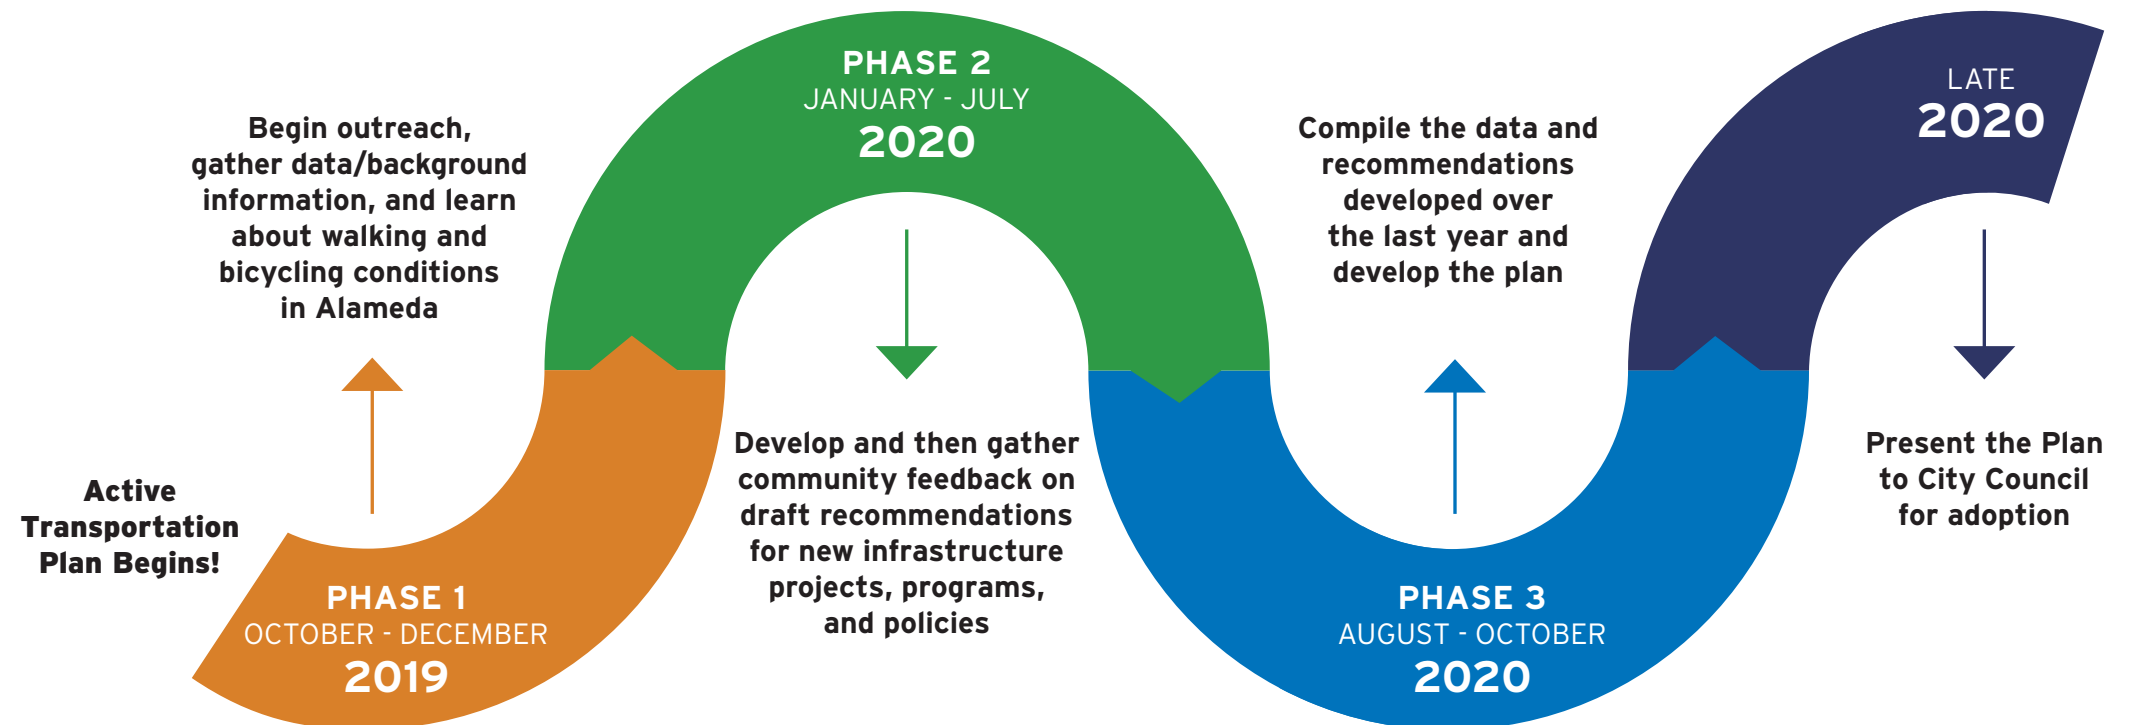

CONNECTIVITY

EQUITY

MODESHARE

WHAT HAS BEEN ACCOMPLISHED SINCE THE LAST PLAN?

Since the last Bike Plan was adopted in 2010, the City has installed **8 miles of bicycle routes**, nearly **4 miles of bike lanes**, nearly **3 miles of separated bike lanes**, and nearly **8 miles of shared-use paths**. Most of these projects are Complete Streets projects that also improve the walking environment. Another **15 miles** of pedestrian and bicycle projects (new installations and existing facility upgrades) are already in the works and should be installed by 2024.
